Dear Trevor Reid and Sunrise School Board;

On June 13<sup>th</sup> & 14<sup>th</sup>, 2024, the Grade 5/6 French Immersion class is planning to visit the Maskwa Project for overnight camping. The 11 students will be taking a school bus to the Maskwa Project (15 minutes from the school.) They will camp in the canvas wall tents provided on-site.

Appropriate supervision will be provided, between myself and a female parent chaperone. Paul Schram will be leading canoe safety and paddling on the Maskwa River. The students will also participate in hiking, mountain biking, plant identification, and other outdoor activities. Appropriate safety measures and procedures will be followed at all times. This camping trip will allow students to explore curricular outcomes in health, science, and social studies in an outdoor environment, while also being able to work on our school goals of mental wellness and belonging in an engaging setting with their peers.

Last year, the Grade 5/6 French Immersion class camped overnight at the Maskwa Project and it was a meaningful last experience for the group to be together before the Grade 6 students moved on to the Grade 7-12 side of the building. The class is looking forward to this trip, and I am hoping to replicate last year's success with this year's group, giving them their own sendoff to Grade 7.

Thank you,

Alexander Kowalchuk
